Compatible with all access control systems, Architect® Blue is an vandal-proof reader for RFID cards and Bluetooth® & NFC smartphones.

WELCOME TO HIGH SECURITY

The reader allows the secure identification of users thanks to its multiple identification technologies.

Bluetooth® and NFC

The smartphone becomes your access key and erases all the constraints of traditional access control.

STid offers 6 identification modes - Prox, long distance or hands-free - to make your access control both secure and instinctive!

RFID MIFARE® DESFire® EV2 & EV3

The reader supports the latest contactless technologies with the newest data security devices:

- **Secure Messaging EV2:** transaction security that protects against interleaving and replay attacks.
- **Proximity Check:** protection against relay attacks.

It integrates recognized and approved security mechanisms such as public algorithms and an EAL5+ certified crypto processor to protect your data stored in the reader.

ULTIMATE SELF-PROTECTION

The patented motion sensor pull detection system protects sensitive data by allowing authentication keys to be erased.

Unlike existing solutions within this market, the reliability of the accelerometer avoids potential system bypass.

CREATE YOUR OWN SCALABLE CONFIGURATION

The Architect® Blue reader can be tailored to your needs, ensuring that all functionalities and security levels can be upgraded across all your readers - by RFID credential, virtual card or protocol.

The scalability allows you to implement new functionality such as a touch screen/keypad, QR Code or biometric module.

OPEN TECHNOLOGIES FOR EASY INTEGRATION

The reader is compatible with all access control systems and accepts multiple interfaces and protocols (Wiegand, Clock&Data, SSCP® and OSDP™).

OUR SECURITY OFFERINGS

- **Easyline:** readers and cards pre-configured and programmed, ready to use.
- **Expert line:** you program your readers and cards in perfect autonomy with the intuitive configuration tools.
- **Individual line:** we offer a wide range of Premium services to configure and customize your readers and credentials according to your needs.
